

Centrepay

A free service for customers to pay bills as regular deductions from their Centrelink payments.

[Centrepay](#) is a free, voluntary deduction service available to anyone receiving Centrelink payments. Centrepay can help you manage your bills and expenses by having a regular amount deducted from your Centrelink payment.

Centrepay can be used to manage expenses like your electricity and gas bills. You can set the amount you want to have deducted each fortnight and we arrange for the deduction to be paid to your service provider.

It's quick and easy to set up, and takes the hassle out of paying bills. It's also a great way to budget for unexpected or increased expenses. You can elect to pay regular manageable amounts to make sure you do not get hot under the collar when that bill arrives.

The easiest way to set up and manage your Centrepay deductions is through your [Centrelink online account](#). You can add a new deduction, change a current deduction, cancel or suspend a deduction.
