

Queensland Centre for Mental Health Learning

30907QLD Course in Administering a Mental State Examination

This program targets staff who are new to the mental health area and is also suitable for more experienced clinicians as a refresher

This one day workshop is nationally accredited by the Australian Skills Quality Authority. The course is predominately designed for clinical staff working in mental health. Learning is interactive and includes the use of video case study vignettes to explore the 9 core components of a mental state examination. At the completion of the course participants will be able to identify and document mental state symptoms using shared language and terminology.
